Ramon Soler hemos ido desarrollando varios sistemas de ahorro de agua y energía basados en la exigente normativa francesa C2 y C3

El sistema C2 de ahorro de agua al 50% se está aplicando por defecto en casi la totalidad de nuestros grifos, desde la gama más económica hasta las altas gamas, excluyendo los monomandos de cartucho pequeño donde los caudales ya están limitados a 6l/min.

Nuestros modelos de ingeniería, nos indican que el ahorro de agua y energía estaría alrededor del 30-35%, siempre sin perder confort para el usuario.

Last years at Ramon Soler we have been developing several water and energy saving systems based on demanding C2 and C3 French regulations.

C2 System of 50% water saving is being applied by default in almost all of our taps, from the most economical to the highest range, excluding the small cartridge mixer where flow rates are already limited to 6l / m.

Our engineering models, indicate that the saving of water and energy would be around 30%-35%, always without losing comfort for the user.

Our single lever mixers comply with the strict NF regulations in France. There is a hard point when one opens the tap, a small pressure point in the handle. This enables the tap to be able to be opened to an intermediate position, enducing a saving of 50% of the waterflow. In the case that more water flow is needed, one only has to open the tap fully. This is also called a scaled opening or two phase system.

BREEAMers

“El certificado BREEAM avala nuestros productos y su diferenciación en el mercado global para aportar valor sostenible de carácter medioambiental a las edificaciones"

Ramon Soler es #breeamer
Una empresa social y ambientalmente responsable

Relación previa con el certificado BREEAM
Asumimos nuestra responsabilidad hacia el planeta siguiendo criterios ecológicos y realizando productos ecoeficientes que permitan optimizar los recursos, teniendo en cuenta la energía que se incorpora dentro de cada producto y los materiales que, durante las etapas de producción, requieran menos energía.
Para Ramon Soler el certificado BREEAM supone una oportunidad para dar visibilidad y transparencia a la ecología y la sostenibilidad de los edificios, características cada vez más demandadas a escala mundial. La preocupación medioambiental y ofrecer griferías sostenibles es uno de los objetivos de nuestra filosofía para lograr una fabricación y distribución respetuosa con el entorno. Las griferías de Ramon Soler® hacen posible la certificación BREEAM en edificios sostenibles, gracias a sus sistemas, incorporados en las griferías, de ahorro de agua y energía y limitadores de caudal. Asimismo, disponemos de patentes exclusivas enfocadas a conservar nuestras griferías contra la corrosión. Además, nuestro equipo de I+D+i da un asesoramiento técnico necesario para poder cumplir con los requisitos de la certificación BREEAM. En definitiva, nuestra naturaleza es ser sostenibles y para ello incorporamos y explotamos al máximo la innovación tecnológica con inteligencia ecoeficiente, sin pérdida de confort para el usuario.
¿Motivos por los que la empresa apuesta por el certificado BREEAM?
“Estamos en pleno crecimiento dentro del segmento del Contract y el uso del certificado BREEAM como calificación exhaustiva, supone una oportunidad para acreditar las cualidades ecológicas y sostenibles de nuestros productos en los proyectos que las demandan”
Manel Lozano– Contract Manager España

"The BREEAM certificate endorses our products and their differentiation in the global market to provide sustainable value of an environmental nature to buildings"

Ramon Soler is a #breeamer

A social enterprise and environmentally responsible

Previous relationship with the BREEAM certificate

We assume our responsibility towards the planet following ecological criteria and making eco-efficient products that allow optimizing resources, taking into account the energy that is incorporated into each product and the materials that, during the production stages, require less energy.

For Ramon Soler, the BREEAM certificate is an opportunity to give visibility and transparency to the ecology and sustainability of buildings, characteristics that are increasingly in demand worldwide.

Environmental concern and offering sustainable taps is one of the objectives of our philosophy to achieve an environmentally friendly manufacturing and distribution. Ramon Soler® taps make possible the BREEAM certification in sustainable buildings, thanks to their water and energy saving systems, incorporated in the taps, and flow limiters. We also have exclusive patents focused on preserving our taps against corrosion. In addition, our R + D + i team gives the necessary technical advice to be able to comply with the requirements of the BREEAM certification.

In short, our nature is to be sustainable and for this we incorporate and exploit technological innovation to the maximum with eco-efficient intelligence, without loss of comfort for the user.

Reasons why the company is committed to the BREEAM certificate?

"We are in full growth within the Contract segment and the use of the BREEAM certificate as an exhaustive qualification, is an opportunity to accredit the ecological and sustainable qualities of our products in the projects that demand them"

Manel Lozano - Contract Manager España

Innovación

Ramon Soler entre sus valores más significativos figura la aportación de innovación al mercado y a la sociedad. De esta forma Ramon Soler se encuentra dentro del grupo de liderazgo de fabricantes internacionales.

En nuestra dilatada experiencia como productor de grifería desde 1890, hemos depositado 115 entre patentes, modelos de utilidad y registros de diseños.

En el pasado año hemos registrado 3 nuevas patentes que creemos van a aportar interesantes soluciones, mayor seguridad y confort, mejorar de costes y facilitar el control de la calidad. Seguimos trabajando e investigando para poder aportar más innovaciones e interesantes productos al mercado.

- Sistema de fijación
- PURE WATER
- Sistema Tourbillon
- Cocinas Magnet

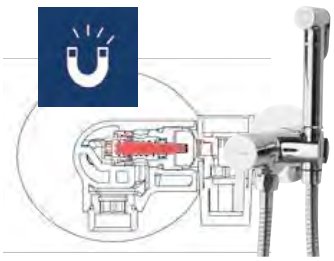

- Ánodo de sacrificio
- WC Magnet
- Montage Temporizados

Seguimos trabajando e investigando para poder aportar más innovaciones e interesantes productos al mercado.

Innovation

Ramon Soler among its most significant values highlights the contributes of innovation to the market and society. in this way Ramón Soler is within the leadership group of international manufacturers.

In our wide experience as a producer of taps since 1890, we have deposited 115 among patents, utility models and design registrations.

In the past year we have registered 3 new patents that we believe will provide interesting solutions, greater safety and comfort, cost improvement and facilitate quality control:

- Fixation System
- PURE WATER
- Tourbillon system
- Magnet kitchen

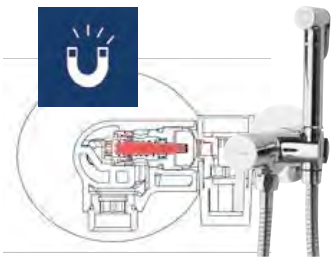

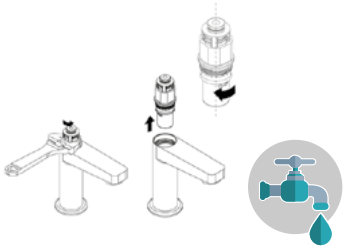

- Galvanic anode
- WC Magnet
- Thermostatic assembly

We continue working and researching to be able to bring more innovations and interesting products to the market.

Mejora en los sistemas de fijación:

Sistema de herradura FAST y sistema TOOL FREE

La mejora del sistema beneficia sobre todo al instalador, ya que se reduce notablemente el tiempo de instalación al igual que la simplifica ya que se evitan las herramientas para instalar el grifo.

Improvement in fixing systems:

FAST anchorage system and TOOL FREE system.

The improvement of the system benefits the installer above all, since the installation time is significantly reduced as well as simplifies it, as any tool is necessary to install the mixer.

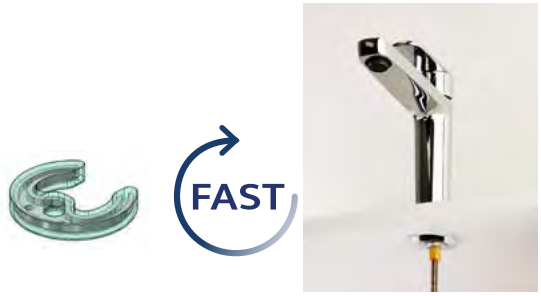

APLICACIÓN GENERAL EN NUESTRAS SERIES

Nueva herradura sobremoldeada (patentada) para sistema de fijación M8

GENERAL APPLICATION IN OUR SERIES

Ramon Soler ha creado y patentado un circuito de agua único y excepcional que controla la fuerza y tensión del agua, para entregarla de forma clara, silenciosa y amable. Como salida de un manantial.

El agua pasa a través de un cartucho standard donde se controla su temperatura y su caudal, es enviada hacia la parte inferior del grifo, donde choca contra el fondo y pierde su bravura, para remontar en un circuito en espiral. Desde allí, es reconducida hacia la caída final donde se libera.

Ramon Soler has created and patented a unique and exceptional water circuit that controls the force and tension of the water, to deliver it in a clear, quiet and friendly way. Like a spring outlet.

The water goes through a standard cartridge where its temperature and flow are controlled, it is sent to the bottom of the tap, where it collides with the bottom and loses its bravery, to go up in a spiral circuit. From there, it is redirected towards the final fall where it is released.

1 Cartucho bajo consumo, donde se controla la temperatura del agua y su caudal.
Low flow cartridge, where it controls its temperature and its flow.

2 El agua es enviada hacia la parte inferior del grifo, donde choca contra el fondo y pierde su fuerza.
Sent towards the bottom of the faucet, where it crosses against the fund and loses its strength.

¡No más fugas!

Ramon Soler ha creado y patentado una doble válvula de seguridad para las duchitas WC.

Después del uso, cuando volvemos a dejar la duchita en el soporte es muy común olvidarnos de cerrar la maneta. El agua va ejerciendo presión durante horas o incluso días, y entonces es cuando existe un grave peligro de fuga de agua e inundación.

Por eso proponemos una práctica e inteligente innovación, incorporando una doble válvula de seguridad en el cuerpo del monomando, que se cierra cuando la duchita se coloca en su soporte. Un sistema de imanes ayuda a que el cierre del paso de agua sea perfecto.

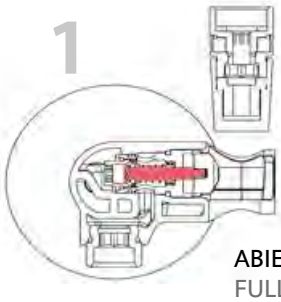

No more leaks!

Ramon Soler has created and patented a double safety valve for WC showers.

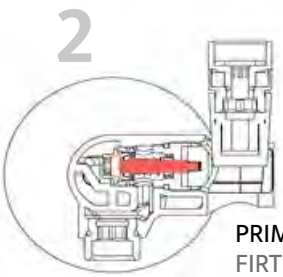

After use, when we put the shower back on the holder it is very common to forget to close the handle. The water exerts pressure for hours or even days, and then there is a serious danger of water leakage and flooding

That is why we propose a practical and intelligent innovation, incorporating a double safety valve in the body of the mixer, which closes when the shower is placed on its support. A system of magnets helps to close the water passage perfectly.

ANTI-LEGIONELA

Siguiendo los reglamentos y las normativas, disponemos de diversos sistemas que evitan la proliferación de la legionela. Nuestros grifos están diseñados con materiales resistentes a los tratamientos con altas concentraciones de cloro, así como a las altas temperaturas necesarias para realizar el choque térmico previsto por la ley (RD 865/2003).

ANTI-LEGIONELA

In accordance to international regulations, we have various features which help to eradicate this virus in hydraulic systems. Our tapware incorporates mecanisms which are chlorine resistant and can resist thermal changes as per Spanish Royal Decree (865/2003.)

EXIGENCIAS SANITARIAS

Nuestras griferías superan las exigentes normativas sanitarias (ACS Francia y KTW Alemania), que garantizan que los materiales en contacto con el agua no suponen ningún riesgo para la salud.

SANITARY REGULATIONS

Our tapware is up to the highest standards and complies with Sanitary Regulations (DFWG Germany and NF France) which guarantee the customers piece of mind.

PROTECCIÓN ACÚSTICA

Nuestra grifería dispone de diferentes filtros acústicos tanto en las entradas de agua de los grifos como en el interior de sus mecanismos de regulación, optimizando la protección acústica.

TERMOSTOP

Las griferías termostáticas disponen de un sistema limitador de temperatura, que indica al usuario el límite de temperatura de uso eficiente de 38ºC a 42ºC. Este sistema limita, mediante un tope de giro del volante la temperatura del agua caliente, pudiendo sobrepasarlo con solo pulsar un botón.

TERMOSTOP

This system avoids the risk of burns and the excessive consumption of hot water. It permits to limit the maximum temperature lock lever through the lever stroke in mixer taps.

ANODO DE SACRIFICIO

Protegemos de la corrosión las superficies de la grifería con un ánodo de sacrificio de zinc-magnesio el cual se coloca en todas nuestras series, tanto en los anclajes verticales como en los murales, asimismo nuestras manetas estan también protegidas. Este sistema patentado por Ramon Soler triplica la vida de nuestros recubrimientos por corrosión externa.

SACRIFICIAL ANODE

In Ramon Soler we protect the surfaces of the faucet from corrosion with a zinc-magnesium sacrificial anode which is placed in all our series, both in vertical anchors and murals, our handles are also protected. This system patented by Ramon Soler triples the life of our external corrosion coatings.

DURABILIDAD

Nuestra grifería destaca por su gran resistencia ya que todos sus componentes externos con desgaste, son metálicos lo que permite una gran durabilidad con el paso del tiempo.

DURABILITY

Due to all external components with higher use being metallic, our tapware is very resistant over long periods of time.

TOURBILLON

Un circuito de agua único y excepcional que controla la fuerza y tensión del agua

TOURBILLON

A unique and exceptional water circuit that controls the strength and tension of the water.

ANTI-CAL

Nuestros rociadores cuentan con boquillas de silicona flexibles las cuales la cal y las impurezas se desprenden fácilmente, incluso frotando con los dedos. Boquillas de máxima calidad resistentes al desgaste, con lo que consigue que el rociador se conserve mejor y que su funcionamiento sea 100% fiable.

ANTI-LIMESTONE

Our hand and headshowers which have flexible silicon outlet tubes filter impurities easily. Ramon Soler uses tubing of the highest quality, which means longer lasting components. A complete maintenance cycle also reduces technical problems.

CUSTOM

A petición del establecimiento hotelero, Ramon Soler® graba a láser el logo del hotel de forma indeleble.

CUSTOM

Ramon Soler can laser mark taps with an establishments logo on its handles making the tap a unique design item

SENSIBILIDAD

Nuestros cartuchos permiten regular cómodamente la temperatura, la mezcla de agua progresivamente, sin cambios bruscos de temperatura. Además, nuestros cartuchos termostáticos reaccionan en menos de un segundo a variaciones de temperatura y caudal manteniendo la temperatura solicitada.

SENSIBILITY

Our single lever and thermostatic cartridges allow us to confortably regulate the desired temperature

DIAMOND FINISH

La superficie de todas nuestras griferías son muy resistentes y poseen un acabado brillo extra gracias a un proceso de cromado y a rigurosos controles de calidad.

DIAMOND FINISH

All of the tapware surfaces are extra resistant and have a shiny extra finish due to the extensive chroming and polishing process.

ERGONOMIA

El diseño ergonómico de nuestras griferías permite el fácil uso para cualquier persona.

ERGONOMICS

The ergonomic shape of our tapware offers ease of use.

2022

Urban Chic leads innovation and design

The collection that fuses the human being nature desires with its urban habitat, was awarded with the **iF Design Award in 2020**. It is recognized, once again, with the **German Design Awards 2022, premium award of the German Design Council** with the special mention: PRODUCT DESIGN, in BATH & WELLNESS category, distinction which pays tribute to consistent design conception and implementation.

The beauty of its lines and the way in which it brings us the water, like a natural, quiet, and pleasant cascade, make it a unique and exceptional faucet collection.

The revolutionary and innovative Tourbillon System is the masterpiece that represents Urban Chic: a sustainable water circuit, never seen before in a faucet. The water passes through a low flow cartridge, where its temperature and flow are controlled. Still without losing its momentum, it is sent towards the bottom of the tap, where it collides with the bottom and loses its bravery, to go up in a spiral circuit where it takes its energy. From there it is led to the final fall, where it is released in a waterfall. URBAN CHIC is daring, slim, novel, and elegant, while being simple and absolutely functional.

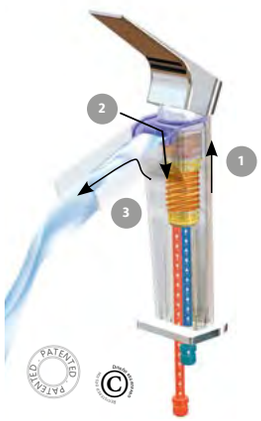

Urban Chic abandera el diseño y la innovación.

La colección cuyo concepto fusiona el deseo de naturaleza del ser humano con su espíritu urbano, fue galardonada con el **iF Design Award en 2020** y vuelve a ser reconocida, una vez más, con el **German Design Awards 2022, premio premium del Consejo Alemán de Diseño,** con la mención especial a la excelencia en DISEÑO DE PRODUCTO de la categoría BAÑO & BIENESTAR, que rinde homenaje a la concepción e implementación del diseño coherente.

La belleza de sus líneas, su forma de ofrecernos el agua en cascada, como si de un manantial de agua clara, silenciosa y amable se tratara, convierten a la colección en un producto único y excepcional.

El innovador Sistema Tourbillon es la pieza clave que hace posible todo lo que representa Urban Chic: un circuito de agua sostenible, nunca antes visto en un grifo.

1. Cartucho, donde se controla la temperatura del agua y su caudal.
   Cartridge, where it controls its temperature and its flow.

2. El agua es enviada hacia la parte inferior del grifo, donde choca contra el fondo y pierde su fuerza.
   sent towards the bottom of the faucet, where it crosses against the fund and loses its strength.

3. remonta en un circuito espiral donde pierde energía. Para finalizar en una caida en cascada.
   comes back in a spiral circuit where it loses energy. to finish in a cascade fall.

ERGONOMIA
El diseño ergonómico de nuestras griferías permite el fácil uso para cualquier persona.

ERGONOMICS
The ergonomic shape of our tapware offers ease of use.

HOTBLOCK
En caso de fallo de suministro repentino del agua fría, nuestro termostático dispone de un sistema que bloquea automáticamente la salida a alta temperatura, lo que podría provocar quemaduras al usuario.

HOTBLOCK
In the event that the cold water supply would fail, it has an automatic blockage system which limits the amount of water exiting at a high temperature and saving the user serious burns.

TERMOSTOP SYSTEM
Las griferías termostáticas disponen de un sistema limitador de temperatura, que indica al usuario el límite de temperatura de uso eficiente de 38º a 42ºC. Este sistema limita, mediante un tope de giro del volante la temperatura del agua caliente, pudiendo sobrepasarlo con solo pulsar un botón.

TERMOSTOP SYSTEM
This system avoids the risk of burns and the excessive consumption of hot water. It allows to limit the maximum temperature lock lever through the lever stroke in mixer taps.

La cromoterapia, un nuevo concepto
Chromotherapy, a new concept

Chromotherapy, a new concept of body and mind harmonization therapy based on energy stimuli generated through colors.

Each color transmits different sensations, and therefore have the ability to influence our emotions and therefore our mood and psychological and physical well-being. It is what we call the psychology of color.

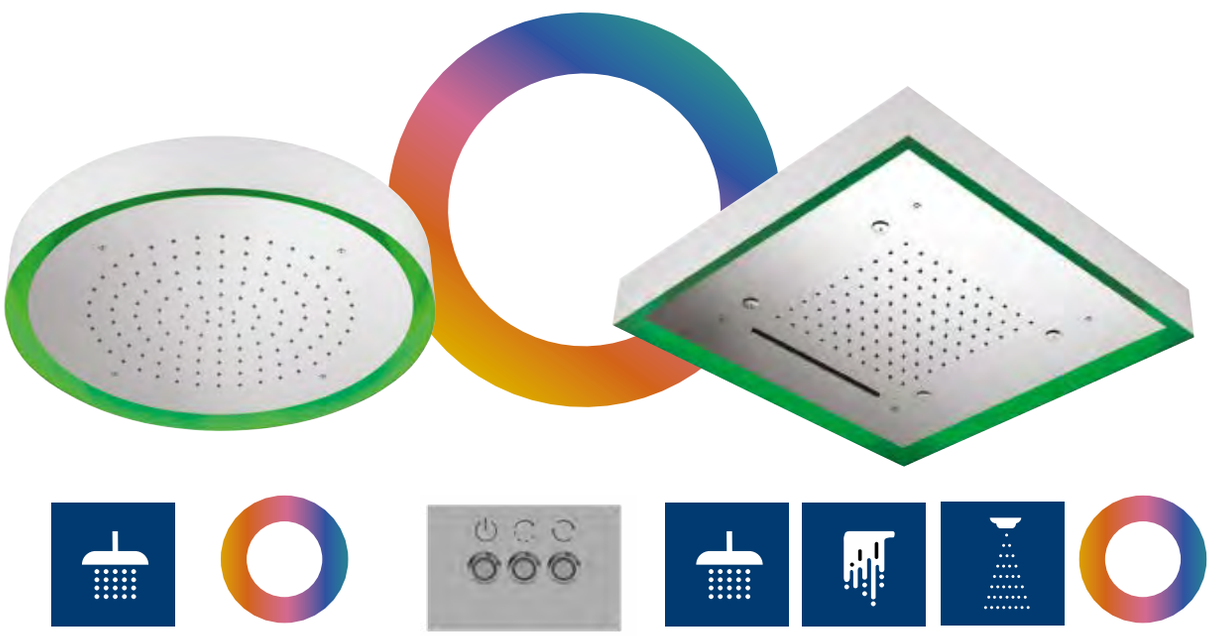

We incorporate a novel system of lights in our more sophisticated head showers, available in a wide range of shades that we can choose during our chromotherapy session in the shower.

It is important the color we are going to choose according to our needs, because depending on the range of color we use, we will enjoy some benefits or others.

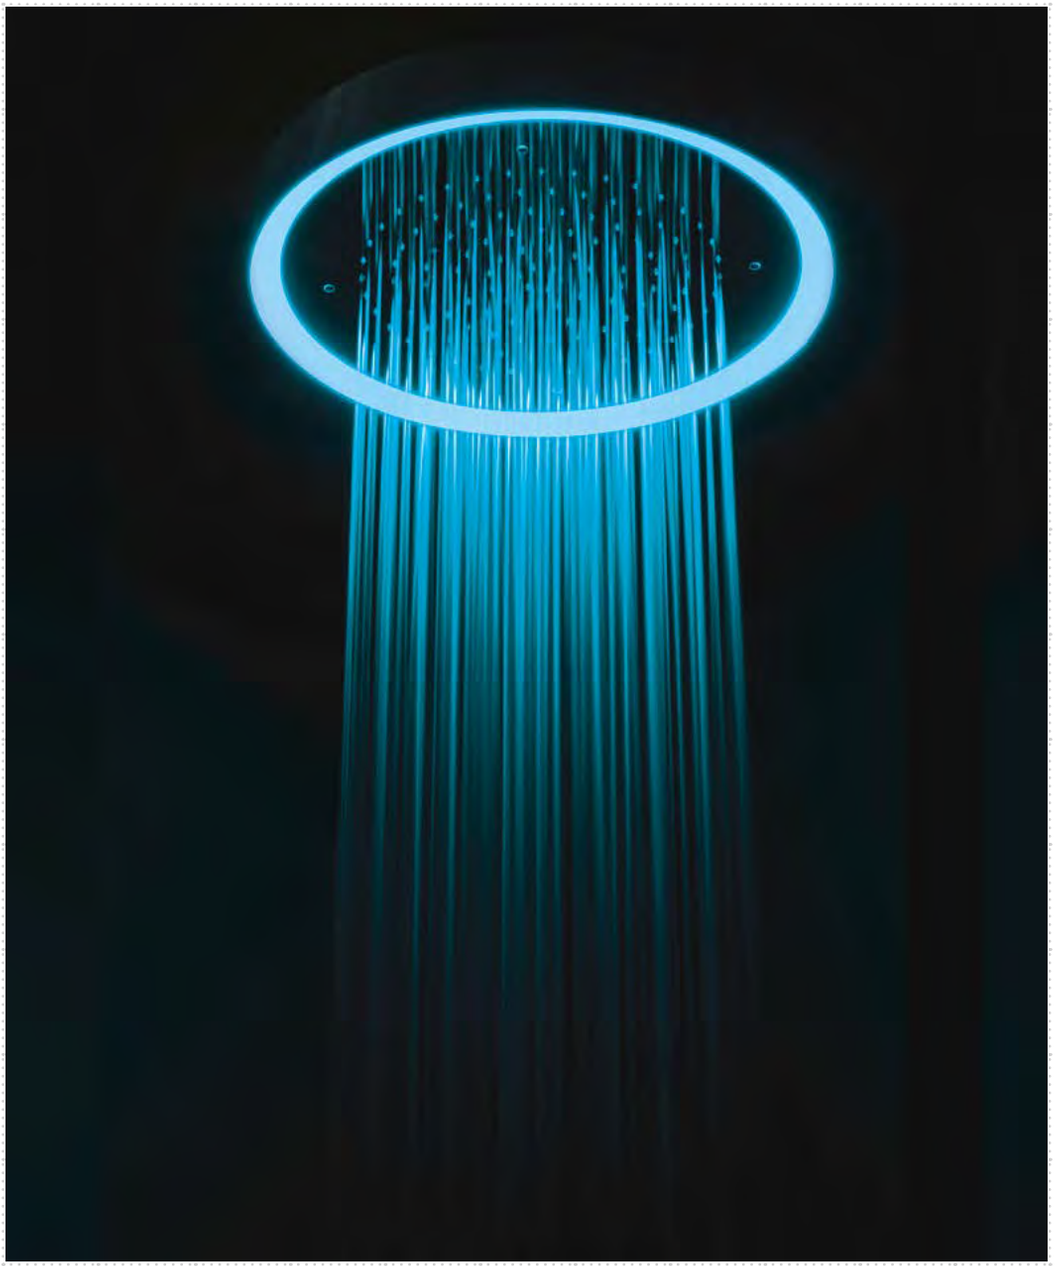

La cromoterapia, un nuevo concepto de terapia de armonización de cuerpo y mente basada en estímulos energéticos generados a través de los colores.

Cada color nos transmite sensaciones diferentes, y por lo tanto tienen la capacidad de influir en nuestras emociones y por ende en nuestro estado de ánimo y bienestar psíquico y físico. Es lo que llamamos la psicología del color.

Incorporamos un novedoso sistema de luces en nuestros rociadores más sofisticados, disponibles en una amplia gama de tonalidades que podemos elegir durante nuestra sesión de cromoterapia en la ducha. Es importante el color que vamos a escoger según nuestros gustos y necesidades del momento, pues dependiendo de la gama de color que utilicemos, disfrutaremos de unos beneficios u otros.

WC MAGNET

¡Ni un escape más! No more FLOODS!

¡Ramon Soler ha creado y patentado un doble sistema de cierre para las duchitas de WC!

Cuando cerramos el agua en la duchita, nos olvidamos casi siempre de cerrar el grifo. La presión del agua fuerza el flexo durante horas e incluso días.... ¡Existe un grave PELIGRO de escape y de inundación!

Ramon Soler ha realizado una práctica e inteligente innovación, al incorporar dentro del cuerpo del grifo monomando una doble válvula de seguridad que se cierra al colocar la duchita en el soporte. Un imán ayuda a que el cierre sea perfecto.

Ramón Soler has created and patented a double closure system for WC showers!

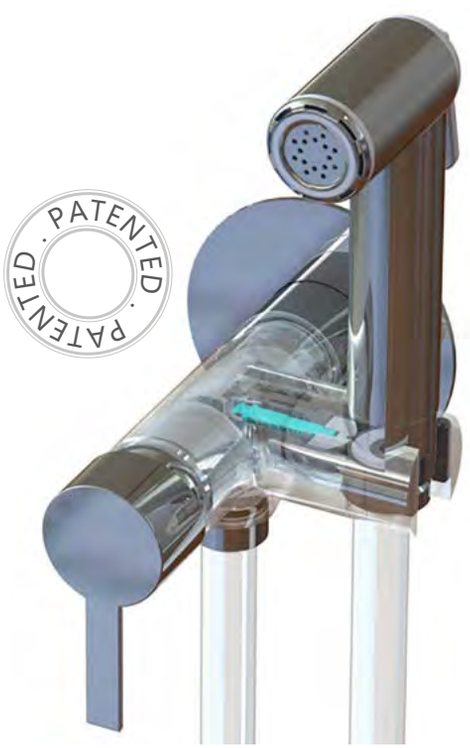

When we return the sprayer in we almost always forget to turn off the mixer. The pressure of the water forces the flexible for hours or even days ... There is a serious DANGER of escape and flood!

Ramon Soler has made a practical and intelligent innovation, incorporating a double safety valve inside the body of the single-lever tap that closes when the sprayer is placed in the holder. A magnet helps that the closure is perfect.

ESTUDIO DE AHORRO DE AGUA
WATER SAVING ANALYSIS

50% 40% 50% 70% 70%

MONOMANDOS
En una gran variedad de modelos con diferentes estilos y segmentos de precio, está integrada la tecnología que permite reducir automáticamente el consumo de agua hasta más de un 50%, asegurando a su vez una salida de agua de máximo confort.

DUCHAS
En los rociadores se ha incorporado una tecnología que permite ahorrar hasta un 40% de agua sin pérdida de confort.

TERMOSTÁTICOS
Los termostáticos de Ramon Soler® consiguen la temperatura perfecta en una fracción de segundo y además mantienen la misma temperatura durante toda la ducha. Se equipan con limitador de caudal (que pueden alcanzar hasta el 50% de ahorro de agua) y botón limitador de temperatura (ahorro de energía).

ELECTRÓNICAS
Apertura y cierre del agua mediante detectores de presencia: al acercar las manos al grifo sale agua y cuando las retiramos deja de salir el agua automáticamente, lo que supone una gran reducción del consumo de agua alcanzando hasta un 70% de ahorro. Además tiene la posibilidad de fijar su temperatura (máximo 60ºC), con lo que también se ahorra energía.

TEMPORIZADAS
Grifería automática temporizada de alta calidad para lavabo y ducha, caudal limitado y simple funcionamiento. Destinada a instalaciones de colectividades o locales públicos donde se requiere ahorro en el consumo del agua que puede alcanzar hasta un 70% de ahorro. Además garantiza una larga duración en condiciones de utilización intensiva.

SINGLE-LEVER MIXERS
In a variety of models with different styles and price segments, the technology in order to reduce water consumption to over 50 % is implemented assuring at the same time the maximum comfort for the user

SHOWERS
Headshowers are designed in order to save 40% of water consumption.

THERMOSTATIC MIXERS
Ramon Soler® thermostatic mixers get the perfect temperature in less than a second and also maintain the same temperature throughout the shower experience. They are equipped with flow limiter button (which can reach up to 50% water saving) and temperature limiter button (energy saving).

SENSOR-LEVEL MIXERS
Our studies demonstrate that using mixers with electronic sensor reduces water consumption of up to 70% savings. It also has the ability to set the temperature (maximum 60ºC), which also saves energy.

SELF-CLOSING MIXERS
Our beautiful design of self-closing mixers allows a saving water consumption up to 70%. The mixers are used mainly in public spaces. It also ensures a long service life under conditions of intensive use.

Nuestros monomandos que cumplen la estricta normativa NF de Francia para el ahorro de agua. Incorporan un tope intermedio en el recorrido vertical de la palanca. De esta forma, el usuario encuentra una resistencia que hace que la palanca del monomando se ubique en una posición intermedia, proporcionando un caudal con un ahorro del 50 % de agua. En el caso de que sea preciso disponer de más caudal, simplemente hay que vencer el citado tope y abrir el grifo completamente. Este sistema también es conocido como apertura escalonada o en dos fases.

Our single lever mixers comply with the strict NF regulations in France. There is a hard point when one opens the tap, a small pressure point in the handle. This enables the tap to be able to be opened to an intermediate position, enducing a saving of 50% of the waterflow. In the case that more water flow is needed, one only has to open the tap fully. This is also called a scaled opening or two phase system.

Servicio y estudios personalizados de ahorro para hoteles

Personalised hotel water efficiency studies

• Asesoramiento Técnico Pre-Venta. A petición del establecimiento hotelero nuestro equipo de análisis y estudios realizará un plan de gestión global para minimizar los costes en el suministro de agua.

• Servicio Post Venta y Calidad. La calidad de Ramon Soler va mucho más allá del ciclo de vida de un producto, cuando ese producto deja de fabricarse, sus recambios permanecen disponibles durante un período de diez años.
Ofrecemos anualmente más de 2.000 productos que cumplen con los estándares de calidad y las normativas europeas má s exigentes.

• We offer the possibility of evaluating the water use and saving which can be undertaken by implementing our systems in any hotel.
• Pre-sales and Post sales service and quality control.
• We currently offer more than 2,000 products which comply with the highest european quality standards.
• Ramon Soler's quality exceeds the life cycle of the product, as we maintain a ten year stock in spare parts.

Los grifos deben cumplir las siguientes características funcionales

Mixers & Standards

La grifería sanitaria de Ramon Soler cumple con la más estricta normativa europea del sector, sobre la que realizamos ensayos en nuestros laboratorios que se encuentran técnicamente preparados para ello:

• Los grifos o mezcladores mecánicos se ensayan conforme a la norma UNE-EN817:2009 y a la norma UNE 19703:2015.

• Los grifos simples y los mezcladores cumplen con la norma UNE-EN 200:2008

• Los materiales en contacto con el agua no han de constituir ningún peligro para la salud a una temperatura de 90º C. No deben producir alteración alguna en el agua a nivel cualitativo, de aspecto, de olor o del gusto. Los materiales susceptibles a la corrosión serán tratados para evitarla.

• Los revestimientos y las superficies significativas de los productos deben cumplir la norma UNE-EN 248:2003.

• Reguladores de chorro, conexiones flexibles, flexibles de ducha, mangos de ducha y rociadores, válvulas,... todos los productos pasan por un proceso de homologación interna en base a la normativa europea aplicable, garantizando tanto los niveles de calidad como la intercambiabilidad de los mismos.

Ramon Soler complies with the strictest European Standards in the sector. Our Quality Lab is technically prepared to conduct tests according such standards:

CUSTOM
A petición del establecimiento hotelero, Ramon Soler® graba a láser el logo del hotel de forma indeleble.

CUSTOM
Ramon Soler can laser mark taps with an establishments logo on its handles making the tap a unique design item

ERGONOMIA
El diseño ergonómico de nuestras griferías permite el fácil uso para cualquier persona.

ERGONOMICS
The ergonomic shape of our tapware offers ease of use.

PROTECCIÓN ACÚSTICA
Nuestra grifería dispone de diferentes filtros acústicos tanto en las entradas de agua de los grifos como en el interior de sus mecanismos de regulación, optimizando la protección acústica.

NOISE PROTECTION
Our tapware has acoustic filters both in water connections as well in the mixing cartridges optimizing noise protection.

LIMITADOR DE CAUDAL
Nuestros limitadores permiten determinar qué caudal máximo se desea, reduciendo el consumo de agua y manteniendo el confort de uso. La limitación standard son 3,7 l/m en lavabos y 8 l/m para duchas

WATER LIMITING
Our water limiting systems can regulate the maximum flow required, reducing water usage and maintaining acceptable levels of comfort. The standard limit is 3.7l/min in basins and 8l/min in showers.

ANTI-LEGIONELA
Siguiendo los reglamentos y las normativas, disponemos de diversos sistemas que evitan la proliferación de la legionela. Nuestros grifos están diseñados con materiales resistentes a los tratamientos con altas concentraciones de cloro, así como a las altas temperaturas necesarias para realizar el choque térmico previsto por la ley (RD 865/2003).

ANTI-LEGIONELA
In accordance to international regulations, we have various features which help to eradicate this virus in hydraulic systems. Our tapware incorporates mecanisms which are chlorine resistant and can resist thermal changes as per Spanish Royal Decree (865/2003.)

TERMOSTOP
Las griferías termostáticas disponen de un sistema limitador de temperatura, que indica al usuario el límite de temperatura de uso eficiente de 38ºC a 42ºC. Este sistema limita, mediante un tope de giro del volante la temperatura del agua caliente, pudiendo sobrepasarlo con solo pulsar un botón.

TERMOSTOP
This system avoids the risk of burns and the excessive consumption of hot water. It permits to limit the maximum temperature lock lever through the lever stroke in mixer taps.

SENSIBILIDAD
Nuestros cartuchos permiten regular cómodamente la temperatura, la mezcla de agua progresivamente, sin cambios bruscos de temperatura. Además, nuestros cartuchos termostáticos reaccionan en menos de un segundo a variaciones de temperatura y caudal manteniendo la temperatura solicitada.

SENSIBILITY
Our single lever and thermostatic cartridges allow us to confortably regulate the desired temperature

ANODO DE SACRIFICIO
Protegemos de la corrosión las superficies de la grifería con un ánodo de sacrificio de zinc-magnesio el cual se coloca en todas nuestras series, tanto en los anclajes verticales como en los murales, asimismo nuestras manetas estan también protegidas. Este sistema patentado por Ramon Soler triplica la vida de nuestros recubrimientos por corrosión externa.

SACRIFICIAL ANODE
In Ramon Soler we protect the surfaces of the faucet from corrosion with a zinc-magnesium sacrificial anode which is placed in all our series, both in vertical anchors and murals, our handles are also protected. This system patented by Ramon Soler triples the life of our external corrosion coatings.

DURABILIDAD
Nuestra grifería destaca por su gran resistencia ya que todos sus componentes externos con desgaste, son metálicos lo que permite una gran durabilidad con el paso del tiempo.

DURABILITY
Due to all external components with higher use being metallic, our tapware is very resistant over long periods of time.

LEED®, el Sistema de Clasificación de Edificios Sostenibles "Líder en Eficiencia Energética y Diseño"

LEED®, or "Leadership in Energy and Design"

LEED®, el Sistema de Clasificación de Edificios Sostenibles "Líder en Eficiencia Energética y Diseño" sostenible, es un sistema internacionalmente reconocido de certificación de edificios sostenibles.

El consumo de agua potable en los edificios comerciales, oficinas y residencial representa un 12 % en el consumo de agua potable. (Fuente: http://www.spaingbc.org/).

Por ello, la grifería se convierte en una herramienta imprescindible para la reducción de consumo de agua. El sistema de clasificación LEED, establece determinados prerrequisitos relativos a la Eficiencia de Agua, y asigna créditos en función de la reducción del consumo.

Con la grifería adecuada puedes obtener hasta 12 puntos para la clasificación LEED.

En Ramon Soler disponemos de la tecnología adecuada y de experiencia en este tipo de proyectos.

No dudes en contactar con nosotros y te asesoraremos para que obtengas la máxima puntuación (calidad@rsramonsoler.com)

LEED®, or "Leadership in Energy and Design" is a green building certification program that recognizes best-in-class building strategies and practices.

The water consumption in commercial, office and residential buildings represents 12% in the consumption of drinking water. (Source: http://www.spaingbc.org/).

Therefore, the tapware becomes an essential tool for reducing water consumption. The LEED classification system sets up certain prerequisites regarding water efficiency and assigns credits based on reducing the water consumption.

With the appropriate tapware you can get up to 12 points for LEED classification.

Ramon Soler have the technology and experience in these kind of projects.

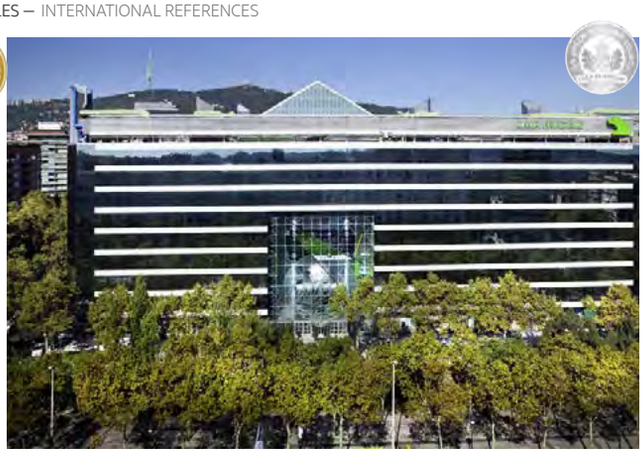

Do not hesitate to contact us and we will inform you how to attain the best water saving ratings. (calidad@rsramonsoler.com)

Los grifos temporizados vienen a cubrir una de las mayores preocupaciones en las instalaciones de lugares públicos:
Gracias a su robustez resiste los daños causados por vandalismo, ha superado ensayos de fatiga de más de 200.000 ciclos respondiendo ante la necesidad de una durabilidad elevada por su alta utilización. Su cierre automático regulable permite al instalador ajustarlo a sus expectativas evitando el exceso de consumo y elimina la posibilidad de dejar la grifería abierta por el olvido, preservando así recursos naturales del planeta. No obstante, a pesar de su robustez y durabilidad la ergonomía del pulsador y su mecanismo permite un pulsación suave (3kg) y agradable, para todo tipo de usuarios.
Nuestra grifería temporizada diseñada bajo la premisa del cumplimiento de ensayos de estanquidad, caudal, comportamiento mecánico bajo presión, resistencia mecánica, dimensiones y acústica según la Norma Europea UNE EN816 para Grifería sanitaria de cierre automático y ensayo de corrosión según UNE EN248 Especificaciones técnicas generales de los revestimientos electrolíticos de Ni-Cr.

- Dependiendo de la presión los tiempos pueden verse alterado.
- Cabezales intercambiables, anti-calcáreos.
- No bloquea el flujo si mantenemos presionado el pulsador.

Además, gracias su versatilidad podemos optimizar caudal y tiempo hasta minimizarlo en un 85%.

Self-closing mixer cover one of the largest concerns in public place facilities:
Thanks to its robustness it resists damage caused by vandalism, has passed fatigue tests of more than 200,000 cycles responding to the need for high durability for its high use. Its adjustable automatic closing allows to the installer adjust it to your expectations avoiding the excess of consumption and eliminates the possibility of leaving the tap open for forgetfulness, preserving natural resources of the planet. However, despite its robustness and durability, the ergonomics of the push button and its mechanism allows a soft (3kg) and nice press, for all kinds of users.
Our timed faucet designed under the premise of compliance with tightness tests, flow rate, mechanical behavior under pressure, mechanical resistance, dimensions and acoustics according to European Standard UNE EN816 for Sanitary faucet with automatic closing and corrosion test according to UNE EN248 General technical specifications of the Ni-Cr electrolytic coatings.

- Depending on the pressure, the timing may be altered.
- Interchangeable, anti-calcareous heads.
- Does not block the flow if we keep the polisher pressed.

In addition, thanks to its versatility we can optimize flow and time to minimize it by 85%.

ANTI-LEGIONELA

Siguiendo los reglamentos y las normativas, disponemos de diversos sistemas que evitan la proliferación de la legionela. Nuestros grifos están diseñados con materiales resistentes a los tratamientos con altas concentraciones de cloro, así como a las altas temperaturas necesarias para realizar el choque térmico previsto por la ley (RD 865/2003).

ANTI-LEGIONELA

In accordance to international regulations, we have various features which help to eradicate this virus in hydraulic systems. Our tapware incorporates mecanisms which are chlorine resistant and can resist thermal changes as per Spanish Royal Decree (865/2003.)

Ahorro Saving

LIMITADOR DE CAUDAL

Nuestros limitadores permiten determinar qué caudal máximo se desea, reduciendo el consumo de agua y manteniendo el confort de uso. La limitación standard son 3,7 l/m en lavabos y 8 l/m para duchas

WATER LIMITING

Our water limiting systems can regulate the maximum flow required, reducing water usage and maintaining acceptable levels of comfort. The standard limit is 3.71/min in basins and 8l/min in showers.

REGULAR EL TIEMPO DE CIERRE ES POSIBLE

LOWER THE CLOSING TIME IS POSSIBLE

QUICK SET-UP! Sin desmontar la grifería y con nada más que un simple destornillador, podemos regular la posición de la aguja hidráulica que nos permitirá ajustar la temporización independientemente de las condiciones de suministro.

Without disassembling the faucet and with a simple screwdriver, we can control the position of the hydraulic needle that will allow us to adjust the timing regardless the flow conditions.

CONDICIONES DE VENTA

1. GENERALIDADES

La aceptación de un pedido implica por parte del comprador la aceptación de las presentes condiciones generales de venta, salvo acuerdo particular entre ambos mediante estipulaciones precisas incluidas en el texto de aceptación del pedido. Nuestros modelos reflejados en esta Tarifa, podrán ser modificados o eliminados sin previo aviso y sin incurrir en niguna responsabilidad o indemnización, así como sus precios.

2. PRECIOS

Los precios de esta Tarifa se entienden sin impuestos y considerando la mercancía puesta en nuestros almacenes. Los impuestos en vigor se establecerán en cada factura. Los pedidos cuyo importe neto sea superior a 150 € se enviarán a portes pagados dentro del territorio de España (excepto Canarias, Ceuta y Melilla, donde el importe deberá ser superior a 300 €). Los P.V.P. son precios recomendados.

3. EXPEDICIONES

Nuestros productos se consideran siempre vendidos en nuestros almacenes y la fecha de expedición es la que figura en nuestra factura. Las mercancías se expiden y viajan únicamente a riesgo (y cuenta) del destinatario, aunque sean enviadas a portes pagados. El destinatario comprobará al recibo de la mercancía el estado de la misma, indicando las posibles anomalías en el albarán del transportista. Declinamos toda responsabilidad en relación con averías o pérdidas de la mercancía por causas del transporte, así como retrasos que puedan producirse por causa del mismo. En caso de error u omisión en una entrega por nuestra parte, nuestra responsabilidad alcanza a reemplazar la pieza no conforme o la entrega de la no remitida.

4. PLAZO DE ENTREGA

Los pedidos que se reciban sin indicación de fecha de entrega, se servirán en el plazo más breve de tiempo, de acuerdo con nuestras posibilidades de entrega y pudiéndolo hacer en varias expediciones. Los plazos de entrega o de expedición son dados a título orientativo. Por lo tanto, un retraso cualquiera o una expedición fraccionada no será motivo de indemnización o reclamación alguna.

5. CONDICIONES DE PAGO

Las facturas serán pagadas en un plazo máximo de 60 días fecha factura.

6. DEVOLUCIONES

6.1. Devoluciones comerciales

No se admitirá ninguna devolución de material que no haya sido pactada expresamente con fábrica o con nuestro representante y autorizada por nuestra DIRECCIÓN COMERCIAL. Para cualquier devolución se definirán exactamente los motivos de la misma, teniendo en cuenta las siguientes premisas:

a. No se admitirá ningún material que, tanto en modelo como en acabado, esté fuera del catálogo y/o de garantía

b. No se admitirá material deteriorado, que presente evidencias de haber sido manipulado y/o instalado, o que no se devuelva en su embalaje original.

c. El material que se encuentre en perfecto estado, tras ser revisado por personal técnico de fábrica, será abonado según la tarifa vigente en el momento de la compra con un demérito del 20% por gastos de gestión.

d. No se aceptará ninguna devolución que no se ajuste a todo lo especificado.

6.2. Devoluciones Calidad

No se admitirá ninguna devolución de material que no haya sido gestionada a través del formulario de incidencias correspondiente y autorizada previamente por nuestro DEPARTAMENTO DE CALIDAD. Cualquier devolución por motivos de calidad debe ajustarte a las condiciones de garantía expuestas en el apartado 8 de estas condiciones generales.

7. HOMOLOGACIÓN Y CERTIFICACIÓN AENOR

El Ministerio de Industria y Energía ha concedido la homologación de la mayoría de productos contenidos en esta Tarifa y AENOR ha certificado el derecho de uso de la marca por considerar que cumplen las condiciones del reglamento aprobado por Real Decreto 2584/81. Así como las características exigidas en las normas UNE-EN 817 para monomandos y UNE-EN 200 para bimandos.

Los productos que han obtenido esta homologación y disponen del Certificado de derecho de uso de la marca AENOR están identificados en la lista de precios y en las piezas con el símbolo.

8. CONDICIONES GENERALES DE GARANTIA RAMON SOLER

Ramon Soler garantiza su grifería durante 5 años ante eventuales defectos estructurales, de material o de fabricación.

Los cartuchos termostáticos, temporizados y mecanismos electrónicos tienen una garantía de 3 años.

Los accesorios (flexos, mandos de ducha, rociadores, soportes, columnas de ducha, etc...) tienen una garantía de 3 años.

Los materiales consumibles y aquellos que se desgastan por el uso ordinario (pilas, filtros, juntas, aireadores, etc...) no están cubiertos por esta garantía, excepto que se demuestren defectos de fabricación.

La fecha de adquisición debe justificarse mediante comprobante de compra.

Para que la garantía sea válida, es necesario en cada caso, la aceptación del defecto por departamento técnico de RAMON SOLER, quien determinará si realiza la reparación, reposición parcial o total de la pieza.

La eventual reparación o sustitución de componentes del producto afectado, no extiende la ampliación de la Garantía.

Quedan excluidos de la garantía:

- Los productos que la instalación y conexionado no se haya realizada según las correspondientes instrucciones de uso o instalación.
- Los productos que la utilización, mantenimiento y limpieza no se haya realizado conforme a las indicaciones del fabricante.
- los daños producidos por uso inadecuado, montaje defectuoso, desgaste natural o medios de mantenimiento inadecuados.
- Los daños debidos a condiciones externas como presión excesiva, condiciones ambientales extremas.
- Problemas funcionales derivados de la existencia de cuerpos extraños, como arena, restos de obra... o acumulación de cal.

En caso de que en el momento de la aplicación de garantía el producto ya no se fabrique, se suministrará un producto similar de igual calidad.

En el caso de conjuntos formados por diferentes componentes, si una de las piezas del mismo presenta un defecto de fabricación se procederá a la reparación o reposición de la pieza afectada, pero en ningún caso se sustituirá el conjunto en su totalidad.

Alcance territorial: La garantía de la grifería se aplicará en país de venta de la misma.

Vías de reclamación:

Las reclamaciones deberán dirigirse al distribuidor o proveedor del producto a fin de que éstos últimos gestionen la garantía con el fabricante.

En caso de no disponer medio de comunicación con el distribuidor/proveedor del producto o verse imposibilitado de localizarlo podrán ponerse en contacto con Industrias Ramón Soler, S.A. según la información de contacto detallada a continuación: incidencias@rsramonsoler.com

GENERAL SALE CONDITIONS

1. GENERAL

Acceptance of an order implies that the purchase accepts these general sales conditions except in the case of separate agreement between the parties embodied in precise stipulations stated in the accepting the order. The models described in this price list may be modified or removed from sale without prior notice without incurringin any liability or responsability for damages. Prices may also be modified without prior notice.

2. PRICES

The prices on this price list are before tax and ex warehouse. Applicable taxes will be established for each invoice. The retail sales prices given are our recommended prices.

3. DISPATCH

Our products are always considered sold at our warehouses and the date of dispatch as stated on ourinvoice. Goods are dispatched exclusively at the risk andat the cost of the consignee. On reception of the goods,the consignee should check their state, reporting any anomalies on the transport delivery note. We decline all responsability for breakage or loss of goods in transports, and for any delays in transport. In case of error or omission in a dispatch, our responsability extends solely and exclusively to replacing the defective part or parts or the delivery of goods not dispatched.

4. DELIVERY TIMES

Orders received which do not state delivery date will besatisfied in the shortest possible period of time in accordance with our possibilities, and may be dispatched in more than one consignment. Delivery times given are for guidance only, and no liability will be incurred by anydelays or partial deliveries.

5. CONDITIONS OF PAYMENT

Failure to comply with previously agreed conditions of payment on the part of purchasers may lead to retention or cancellation of orders pending until the entire debt ispaid. The purchasers will be liable to pay the expenses incurred by any delay in payment beyond the dates established, even if by mutual agreement.

6. RETURNS

6.1 Stock Returns

Stock returns will not be admitted by the factory unless they have been accorded directly with our agent and authorised by the Sales Manager. For each of these returns a specific reason shall be given, taking into account the following:

a. No returns will be accepted of obsolete material or goods out of warranty.

b. No deteriorated material shall be accepted, which has been manipulated or installed, and which doesn't have the original packaging.

c. The returned goods (after being checked by factory personnel) will be credited using a depreciation of 20% on the current list price minus the corresponding discount.

d. No other types of returns shall be accepted which do not comply with the aforementioned points.

6.2 QUALITY CONTROL RETURNS

No returns will be undertaken which have not been duly processed with the correct "incidents" form and authorised by the quality department. Any returns done due to quality issues will be in the warranty conditions expressed in chapter 8 of the general sales conditions

7. APPROVAL AND AENOR CERTIFICATION

The Spanish Ministry of Industry and Energy has officially approved most of the products in this price list and AENOR has certified the right to use the trademark as they comply with the conditions approved by RoyalDecree 2584/81 and the conditions required by the standards UNE-EN 817 for mechanical mixing valves and UNE-EN 200 for single and mixer taps. Products thus approved and certified for the use of the AENOR trademark are identified in catalogues and on the parts themselves by the symbol.

8. FIVE-YEAR GUARANTEE

Ramon Soler guarantees its tapware during 5 YEARS against structural or material or manufacturing defects.

Thermostatic cartridges, self-closing cartridges and electronic components have a guarantee of 3 years.

Accessories (flexible hose, handshowers, headshowers, wall supports, shower columns, etc...) have a guarantee of 3 years.

Consumable materials and those which wear out from ordinary use (batteries filters, aerators, seals) are not covered by this guarantee, except if they have manufacturing defects.

Date of purchase must be shown via invoice or receipt.

In order to the warranty claim to be covered, in each case the defect must be revised and accepted by Ramon Soler After Sales Dept., who will determine whether repair the product, partially replace a component of the product or replace the product completely.

The eventual repair or substitution of the components does not prolong the guarantee.

Guarantee of the products does not apply if:

- The installation and connection to the system has been not undertaken according to the installation manual or use instructions.
- The use, maintenance and cleaning has been not undertaken in conformity with Ramon Soler instructions.
- The damage produced by an inadequate use, defect installation, natural wear out or incorrect maintenance
- The damage produced by external conditions like too high pressure or extreme environmental conditions.
- Functional problems due the impurities of the water as sand, construction waste or limestone accumulation.

If the product claimed in guarantee has been discontinued in our product line, it will be substituted by one of similar characteristics.

In the case of products set formed by different products, if a product part presents a defect, it will be repaired or changed such product part and not the rest of the components set.

The guaranteed product will be applied in the country where the product has been sold.

The claim of the guarantee must be done through the retailer or distributor where the product has been sold. In case of not knowing where to claim, the claims must be addressed to Industrias Ramon Soler S.A.:

incidencias@rsramonsoler.com or +34 93 373 80 01

9. RESERVATION OF OWNERSHIP

Products supplied will remain the pro-perty of RS until complete payment of the corresponding invoice has been made.

10. JURISDICTION

In the interest of conserving good commercial relations, INDUSTRIAS RAMÓN SOLER, S.A, desires to resolve any differences with our customers through amicable agreement. Nevertheless, in the case of litigation, both parties submit themselves to the jurisdiction of the courts and tribunals of Barcelona, expressly renouncing any other jurisdiction.
